The SBTL5200 is a swing barrier turnstile for additional Lane series designed for smooth and silent operation and draws very little power. It's made of stainless steel which makes SBTL5200 highly durable.

SBTL5200 barriers are normally held in a locked position, thus denying access to the secured side. Upon SBTL5200's reader (RFID and/or fingerprint) positively recognizing a user's valid access card or fingerprint, its barriers swing automatically, thus allowing users passage to the secured side.
